Docsoft Inc. Ranks Sixth on Metro 50 List

Oklahoma City, OK, September 16, 2009, 10 am -

Docsoft Inc. was named Sixth fastest growing company in Oklahoma City at the **2009 Metro 50 Awards** hosted last night by the Greater Oklahoma City Chamber of Commerce. The Metro 50 awards list the Greater Oklahoma City Metropolitan Area's 50 fastest growing, privately-owned companies for the year. Companies are ranked based on their percentage of annual growth. Qualified companies are required to have revenues of at least \$1 million. Docsoft's 130% per year growth rate earned the company's spot at number six on the list. Awardees were honored at the Metro 50 Awards Banquet at the Cox Convention Center Tuesday, September 15th by Oklahoma City Mayor Mick Cornett and the Metro 50 Awards Committee.

"Our team has worked hard to move this company from a small, budding technology, transcription, and software development company to a leading provider of audio video (AV) search, closed captioning systems and custom software solutions. I am extremely proud of the progress this award represents for our company" states Docsoft's owner, Phil Miller.

Metro 50 companies demonstrate positive growth in revenues; growth in the number of employees; creativity/entrepreneurship; and business development through the expansion of facilities, customer base or markets. The Metro 50 Award allows both emerging companies, as well as companies that have exhibited a substantial history as an established business, to be recognized.

Established in 1998, Docsoft, Inc. provides software and hardware tools that allow customers to quickly and easily search spoken content within their digital audio and video files. With several products and services to choose from, Docsoft makes captioning, transcription and time synchronization of media quick and easy. In addition, Docsoft's experienced team develops custom software solutions for a wide range of industries.
